DESCRIPTORS: Therapy, *Asthma, *Air, *Ions,
Particles, Blood chemistry.

Light air ions with a negative sign, utilized without the
use of side physical influences or chemical substances,
possess a certain physiological action. When a thera-
peutic dose of light air ions with a negative sign (about
100-150 billion in one session) is utilized, the composi-
tion of the blood improves and the resistance of the
serum colloids becomes stabilized. The course of treat-
